Year 6 Newsletter

*It's almost the end of the year already!
Year 6 have continued to work hard and
have been busy practising their end-of-year
production.*

*Year 6 team: Miss Cooper, Miss Dove, Mrs.
Harris and Miss Goodworth.*

PE

During P.E. this term, both classes have enjoyed taking part in a series of different athletic sports.

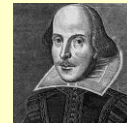

Art

In art, Year 6 have been busy designing and creating props for the end-of-year production. The children have used their artistic skills to papier mache and paint some fantastic pieces. This has also given them the opportunity to develop their team-working skills.

History

In history, the children have learned about William Shakespeare and his impact as a playwright. They have enjoyed reading some of his plays in comic book form.

The children should be very proud of their hard work and their achievements this year.

We would also like to thank all the parents and carers who have supported the children throughout the year and for coming to watch them graduate and perform.

Good luck for Year 7 and best wishes for your future success!

Year 6 Team

Home Learning

In our year 6 home learning, we have continued to practise our maths skills and refine our reading skills with comprehension booklets.

Spellings

Year 6 have worked hard to learn their spellings throughout the year. This was clear when it came to taking part in the school's first Spelling Bee competition. Well done everyone!

Reading Books

Please make sure that reading books and reading diaries are brought into school **every day!**

All books must be returned before the end of the term.

English

This term, Year 6 have been creating their own adverts. The children designed their own brand of footwear and then incorporated persuasive language features into their advertisements. Following on from this, the children looked at comic strips. They learned about how different features impact the reader.

Mathematics

In mathematics, we began the term by looking at statistics. The children learned how to read and construct line graphs and pie charts. We then moved on to study algebra and ratio and proportion.

Science

Our science topic this term has been 'Evolution and Inheritance'. We began by looking at inherited features and variation. We then studied various plant and animal adaptations. Following this, we moved on to learn about the fossilisation process and even had a go at creating our own fossils!
