

The **Year 1** team consists of Miss Newman, Mrs Davies, Mr Caldwell and teaching assistants, Miss Rana and Miss Aurela.

As a year group this half term, we have worked really hard at our new topics and have enjoyed getting used to our new classrooms and teachers!

English and Maths

In English, we have been reading the book 'On the Way Home' and have been focussing on how we can describe each character. In Maths the children have been learning how to solve addition, subtraction, multiplication and division questions through practical activities.

Science

In Science the children have been exploring the use of everyday materials. They have using their senses to help them describe the properties of wood, metal, wool, fabric and glass.

Art and Geography

In our art lessons, the children have been practising making their own repeated patterns using leaves. In Geography, we have been looking at our local area. The children have been recognising places familiar to them, such as their local park and identifying if they are near or far from our school.
