

# Year 3 Stanton Bridge

## Vol. 1 Autumn Term: Core Subjects

Our Staff in Yr3:

Mr. T, Miss Begum and Miss Kazcor

### Maths

In Maths, we have done great learning thus far. We know how to tell the time – both digital and analogue.

We can convert time from both digital to analogue and vice

versa. We used clocks and also learned how to draw hands on analogue clocks.

### Science

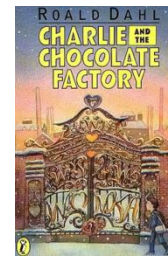

In Science, we learned so much about the human body as well as animals. We learned about the skeleton and its functions. We also learned about our muscles and how they work in pairs.

Our favourite part was doing an investigation in class about exercise. We also learned more about a balanced diet and the different food groups.

### English

In English, based on the text Charlie and the Chocolate Factory they have written a narrative story and a biography based on

Willy Wonka. In year 3 we are working hard with the children to improve their writing. We are focusing on using expanded noun phrases and up-leveled adjectives to describe and give detail to characters and setting.

## Autumn Term: Foundation Subjects

### Computing

During our first half term our topic was 'We are Presenters'. This unit gave children a chance to make a short narrated video and to use this to help improve their performance. They have also learnt how to edit their videos using iMovie software. After half term, our topic was 'We are Programmers'. In this unit, the children created an animated cartoon using characters they designed. After

using a paint tool to create characters and backgrounds, they created an animation by translating a storyboard into a series of scripted instructions using 'Scratch' software.

# RELIGIOUS EDUCATION

## Religious Education

Children were learning about the ways in which Christians, Hindus and Muslims describe God and what God means to different people. This involved various group tasks discussing how beliefs about God affect our lives on a daily basis and how God is perceived in different religions.

We will keep you posted on our learning as we experience them next term.
