 B.Ed. (Hons) Primary, NPQH

22nd November 2021

Dear Parent/ Carer,

Advice for Children close contacts of positive COVID-19 cases

We have been advised that there has been a confirmed case of COVID-19 within Nursery class at Stanton Bridge. **Therefore, Nursery will be closed immediately until Monday 29th November 2021. Nursery will reopen Tuesday 30th November 2021.**

We have identified that your child may have been in close contact with the affected case. In line with the local guidance we recommend that your child has a PCR test (if they have not tested positive in the last 90 days). Please book online at: <https://www.gov.uk/get-coronavirus-test>

Your child, and other members of your household can continue normal activities, provided your child (or anyone else in the household) does not develop symptoms whilst awaiting the PCR result.

In addition to the PCR test, we are advising children and parents to undertake lateral flow tests twice weekly (unless they have tested positive in the last 90 days). For information regarding access to lateral flow tests see:

<https://www.nhs.uk/conditions/coronavirus-covid-19/testing/regular-rapid-coronavirus-tests-if-you-do-not-have-symptoms/>

Should the PCR (or any lateral flow testing) yield a positive result, we would ask that you inform school, your child isolate, with your household, and follow national “Stay at Home” guidance:

<https://www.gov.uk/government/publications/covid-19-stay-at-home-guidance>

We are asking you to do this to reduce the further spread of COVID-19 to others in the community. If you need support with isolation, please contact your local Council For Coventry the contact is 08085 834 333.

Please see below guidance for if your child/anyone in the household develops COVID-19 symptoms.

What to do if your child develops symptoms of COVID-19

For most people, especially children, COVID-19 will be a mild illness.

The most common symptoms of COVID-19 are recent onset of:

- new continuous cough and/or
- high temperature and/or
- a loss of, or change in, normal sense of taste or smell (anosmia)

If your child develops any of these symptoms of COVID-19, they should remain at home and arrangements should be made for them to be tested. This should be a test taken at an NHS site (a PCR test) and **NOT** a rapid test taken at a community testing site (an LFT test). At that time all other household members must also stay at home, not go to work, school or public areas, even for exercise.

Testing can be arranged by calling 119 or online:

<https://www.gov.uk/get-coronavirus-test>

When the result of the child's test is known further advice will be available.

How to stop COVID-19 spreading

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID-19:

- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards

Further information

Further information is available at nhs.uk/coronavirus

Yours sincerely,

Mrs Sofina Islam OBE
